

1. Launch Eclipse(OEPE) with new workspace
2. Open Java EE Perspective from “Window” menu

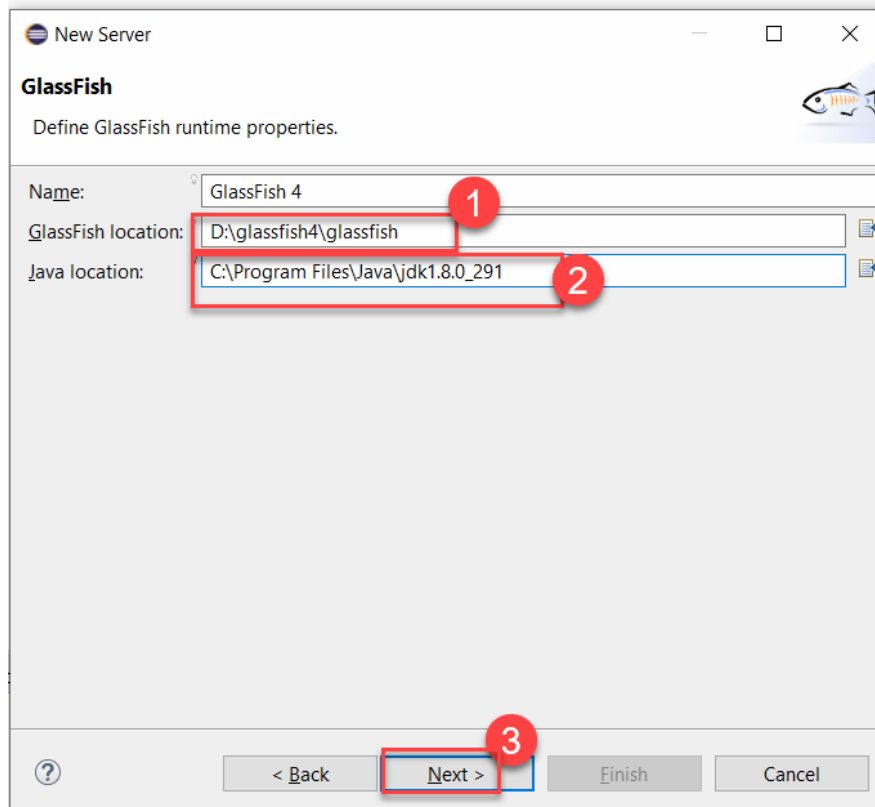

3. Click on link to add new server (from servers panel)

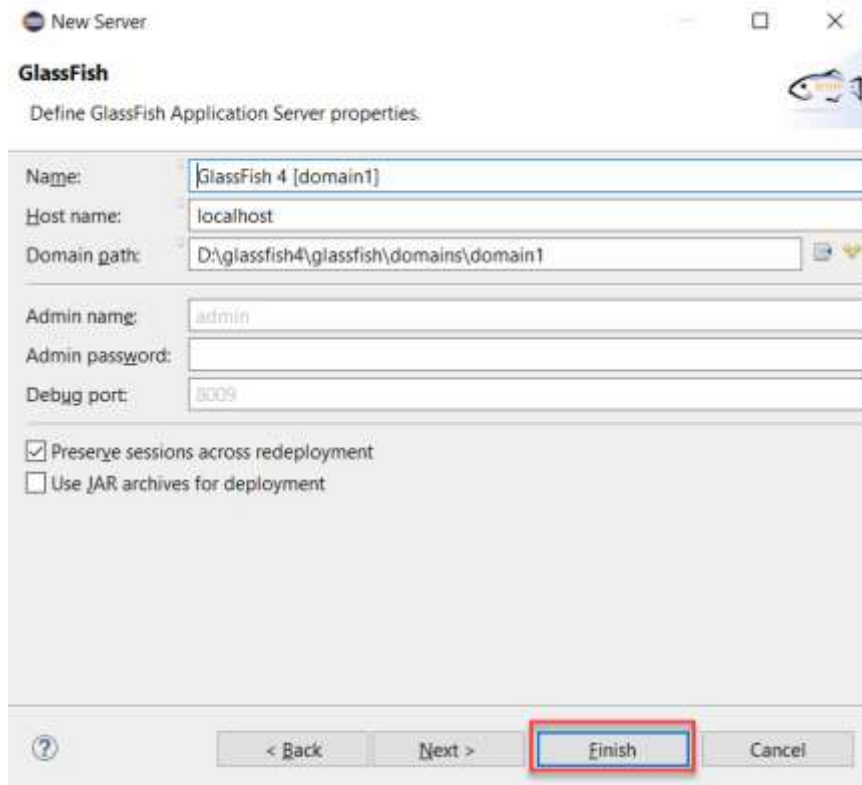

4. Search for “glass” and select “Glassfish” then click “Next”

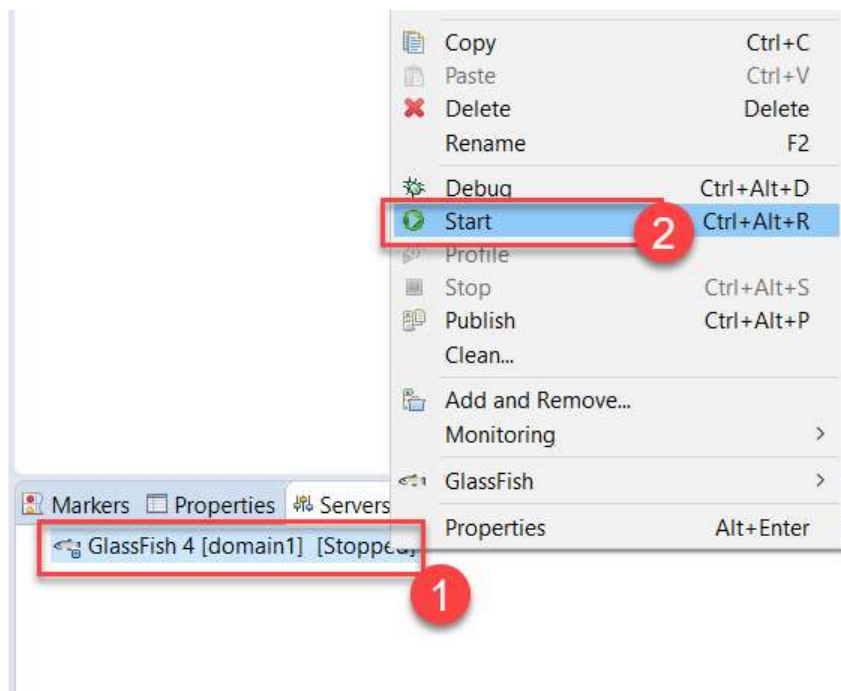

5. Provide Path to Glassfish server and path to JDK 8 (Supported JDK: 6,7 & 8)

6. Accept the default values and click "FINISH"

7. Once linked, GlassFish can be started now from context menu (Right click) from "Server Panel"

8. Now, The Server Admin Console should open like this one:
